2019 Fall Newsletter

ENTITY CHANGE

If you have made any changes to your entity we need to know by sales closing. Examples would be: change of marital status, death, social security to EIN # or a trust. If you change the name or dissolve the entity please notify us before it is too late to make corrections otherwise you could risk being uninsured/over insured.

WHEAT REVENUE PROTECTION

The projected harvest price of 2018 SPRING WHEAT has gone down. The bushel guarantee has risen 14%. WINTER WHEAT Revenue projected price has risen to \$5.70 (still trading and not set yet). If you have a loss we will pay the higher price.
WE NEED YOUR PRODUCTION NOW
WW looks like 2019 price will be around \$6.00

UNINSURED LOSS

We may be able to increase your APH due to a few uninsurable causes of loss by someone else.
I.E. some fires or chemical drift.

FORAGE

Premiums will increase in 2019 due to increase in hay value.
MT 2019-\$156
2018-\$126
WY 2019-\$145
2018-\$123

PRODUCTION AUDIT

If you don't have sold records or a loss and you feed your production please call and we will send out an adjuster to verify your production. Random audits can cost you money on assigned yields. Please report all forage production by bale count and weight per field.

NOTICE OF LOSS

It is very important to get production to us as soon as possible so we can determine a revenue or production loss per unit.

If you intend to do something with your crop other than the way you insured it, for example hay your barley or silage or earlage your grain corn, the crop needs to be adjusted BEFORE you do anything. Call us and we will get an adjuster out for you.

When in doubt, please call the office. Our hours are Monday-Friday 8am-5pm closed from 12-1pm.
